SUMMARY

Python Software Developer with 1.9+ years of hands-on experience building enterprise applications, AI-powered systems, SaaS platforms, and middleware solutions. Proven expertise in Python, Frappe, ERPNext, Django, and API integration. Skilled at translating complex business requirements into production-ready software, delivering measurable impact: 90% efficiency gains, 85% error reduction, and 40% faster resolution times across multiple projects.

WORK EXPERIENCE

• Junior Software Developer

Neotec Integrated Solutions Pvt Ltd

December 2024 – Present

Hyderabad & Saudi Arabia

- Architected and enhanced CentralHRMS, an enterprise HRMS platform processing payroll and HR operations for 10,000+ employees across 30+ Saudi-based companies.
- Built automated employee compliance validation system that consolidated data checks including salary structures, attendance, leaves, overtime, and loans into a single dashboard, reducing HR manual verification time by 90% (from 40 to 4 hours weekly) and decreasing payroll errors by 85%.
- Implemented safe database migrations and patches for multi-site production deployments (v0.0.1 to v0.1.12), handling schema changes without data loss, preventing compliance violations, and enabling faster payroll processing.
- Designed payroll automation including salary component calculations, GOSI compliance validation, overtime processing, and approval workflows for complex Saudi labor regulations.

• Junior Software Developer (Intern)

Spritle Software

May 2024 – September 2024

Chennai, India

- Developed AI-powered ticketing system for Singapore Changi Airport with automatic call transcription, consolidating customer call audio, transcribed text, timestamps, and issue data in a unified admin dashboard for faster issue resolution.
- Built Python middleware service integrating bus fleet management with employee database, reducing manager lookup time by 97% and eliminating 2+ hours of daily manual data synchronization.
- Implemented data transformation, validation, and API integration logic ensuring reliable real-time data synchronization across enterprise systems.

KEY PROJECTS & BUSINESS IMPACT

• CentralHRMS – Enterprise HRMS & Payroll Platform (10,000+ Employees)

Tech Stack: Python, Frappe, ERPNext, MariaDB, JavaScript, REST APIs

- Reduced HR manual verification time by 90% (40→4 hours weekly) and decreased payroll errors by 85% (15–20→1–2 monthly).
- Architected automated compliance validation system scanning all employee records against required data points including salary structure, attendance, leaves, overtime, and loans, and consolidating findings in a single dashboard.
- Implemented safe database migrations handling version mismatches between production sites without data loss or downtime.
- Eliminated GOSI compliance violations and supported HR operations for 30+ Saudi companies with 10,000+ employees.

• AlphaX – Multi-Tenant SaaS Platform (15+ Companies, 25,000+ Employees)

Tech Stack: Python, Frappe, JavaScript, REST APIs, MariaDB

- Reduced implementation time by 86% (4–6 weeks→2–3 days).
- Designed and built automated site provisioning system that eliminates manual company configuration by pre-building complete HR infrastructure including attendance, payroll, leave management, employee data, and workflows.
- Transformed client onboarding from a 4–6 week manual configuration process to a 2–3 day automated deployment, enabling rapid scaling.

- **FMS – Singapore Changi Airport Ticketing System (AI-Powered)**

Tech Stack: Python, Django, Django REST Framework, MySQL, Bootstrap, JavaScript

- Reduced issue resolution time by 40% (3–4 days→1–2 days) and consolidated 200+ monthly tickets from multiple data sources.
- Built AI-powered ticketing system that automatically transcribes customer support calls to text, consolidating audio files, transcripts, timestamps, customer names, and issue details in a unified admin dashboard.
- Enabled support team to view complete customer interaction context in one place instead of manually reviewing multiple systems, reducing mean time to resolution and improving service quality.

- **Coach Manager – Bus Fleet Management Middleware**

Tech Stack: Python, XML, REST APIs, SOAP, JSON

- Reduced manager lookup time by 97% (15min→30sec) and eliminated 2+ hours of daily manual data entry.
- Improved schedule adherence by 5% through real-time data accuracy while managing data for 500+ buses and 1,200+ employees.
- Architected Python middleware service fetching vehicle details, timings, shifts, and driver/ employee data from multiple APIs, transforming XML to JSON and consolidating it in a single unified system.
- Eliminated the need for managers to check three separate systems for bus details, driver information, and shift schedules, reducing operational delays and manual scheduling errors by 90%.

TECHNICAL SKILLS

- **Programming Languages:** Python, JavaScript
- **Frameworks & Platforms:** Frappe, ERPNext, Django, Django REST Framework
- **Databases:** MariaDB, MySQL, SQLite
- **Web Technologies & APIs:** REST APIs, SOAP, JSON, XML, HTML, CSS, Bootstrap
- **Tools & Version Control:** Git, GitHub, VS Code, Linux, Postman
- **Core Competencies:** HRMS & Payroll Systems, SaaS Platforms, API Integration, Data Migration, Workflow Automation, Database Design, Production Debugging, Business Logic Implementation, Middleware Architecture

EDUCATION

- **Sir C R Reddy College**

B.Sc. MECs

- GPA: 7.28

February 2021 – August 2023

Eluru, India
